Equipped with an internal rechargeable backup battery with autonomy of up to 3 hours. The camera is equipped with 4 invisible IR LEDs for night vision and a microphone. Record audio and video on micro SD (max 64GB - not included) and send push notifications in case of motion detection. Supports ONVIF protocol. Controlled via Smartphone, with the HeySmart App, available for Android and iOS.

HeySmart offers a line of products and services for the intelligent control of lighting, security and home automation.

HeySecurity, the line dedicated to the Security sector, includes video cameras, sensors and detectors that can be controlled by telephone and/or voice assistants. Thanks to the Wi-Fi connection, the system sends a real-time notification of any event, home wherever you are.
